

Help your students get great grades with on-demand tutoring.

We all want our students to succeed in high school and beyond, but teachers cannot be available at all times of the day. On-demand tutoring from The Princeton Review was designed to bridge this gap. Your students can access expert tutors in more than 40 subjects to get help with homework, study for a test, or write an essay.

Equalize and Expand Educational Opportunities

Your students can go online, enter the subject they need help with, and be connected with an online tutor in minutes. This instant access helps level the playing field and give students the assistance they need in more than 40 subjects.

Simplify Technology

Your students can connect with a tutor anytime and anywhere they have access to the internet—this means their personal or a library computer or their phone. There are no downloads or plug-ins required. Anytime a student is stuck on homework, we're here to help.

Client Care

Setting up on-demand tutoring for your students is easy; there is very minimal technical setup required. We're also here to support you through setup and beyond and provide regular training for your staff.

Predictive Insights

We support a variety of integration methods to provide our partners with access to their students' data and progress. Predictive Insights Data Analysis provides early, actionable data that help accelerate the intervention timeline by determining whether a student lacks prerequisite knowledge or is struggling to master key content.

"We decided on [The Princeton Review's on-demand tutoring] to give all of our students access to one-on-one help 24 hours a day. Many of our students have commitments that make attending traditional after school tutoring difficult. The Princeton Review meets our students where they are—on their phone, laptop, 10 o'clock at night, or on the bus from the game—and gives them personalized, live help no matter what the time. The service has been unbelievably popular with our students and over 97% of them recommend this to their friends."

**—David Bensinger,
Director of Instruction,
Granada Hills Charter
High School**
